

## **Coronavirus (Covid-19) catch-up premium**

The school has begun using the Coronavirus (Covid-19) catch-up premium in the following ways:

- extra Year 11 Maths lessons for specific students
- extra Year 11 English lessons for specific students
- Year 13 Geography field trip(s) for coursework
- half term revision sessions
- Remote mentoring in Maths for selected Year 11 students through Undergraduate mentoring scheme
- Computing teaching resources for remote learning

It is envisaged that the Coronavirus (Covid-19) catch-up premium will be used in the following ways in the future:

- extension of Undergraduate mentoring scheme to include more students in Maths and other subjects
- remote mentoring in a number of students through a commercial partner as part of National Tutoring Programme
- revision materials (such as revision guides and website subscriptions)
- revision sessions

The effect of this expenditure on the educational attainment of the pupils involved will be assessed through their progress through the curriculum and performance in regular subject-specific testing.
