12 March 2021

Dear Parents and Carers

Up to one in three people who have COVID-19 can spread the virus without knowing. This is because they have no symptoms. To reduce the spread of the virus, we need to identify those individuals. We can do this in Oaklands by carrying out tests at home twice every week, 3-4 days apart.

The Government has recently announced that all secondary and college aged students will be offered tests to make the return to schools safer for everyone.

Testing Students at Home

Students will collect home test kits from the school's Test Centre in the Gym and these will be issued as they have their third LFT in school.

Only students whose parents gave consent for the three lateral flow tests in school will be issued with home packs.

If you did not give consent and now wish your child to be issued with a home testing kit, please contact Provision@oaklandscatholicschool.org and we will arrange for your child to complete one LFT in school before the home testing kit is issued. This is to ensure that your child knows how to conduct the test properly before they undertake them at home.

Students who have had COVID-19 will be issued with home testing kits once they pass 90 days since their positive test result.

We are asking that all students to take their tests on a **Sunday and Wednesday evening** before 7.00pm. The timing of the tests then enables us to identify any positive cases, through the reporting mechanism, so that track and trace procedures can be implemented BEFORE students come into school on a Monday or Thursday morning. Taking the test in the evening will also ensure students are not late to school if for example, if there is a void result and the test has to be repeated.

Students will also need to tell both the NHS **and** Oaklands the result of each test and this can be done using **Test Register**. Please follow [this link](#) for step by step instructions on how to do this.

Students have been sent an email with an activation code to register, so please help them with this process.

Tests are free of charge. Students will initially receive two packs of three tests in boxes with an updated leaflet on how to take the test and report the results.

These kits are for student use only.

Taking the Test

Students should take the test twice a week as outlined above. We will give students a leaflet with instructions on how to do the test with the kit. There is also a useful video to show you how to take the test [here](#) and a useful four step reminder can be found on our website and by clicking [here](#).

[Help and support is available](#), including instructions in different languages on how to test and report the results and a video showing you how to take the test. A Parents Guide can be found on our website and by clicking [here](#).

There is no need to keep used test equipment after the test result has been reported. You can put it in your normal bin (household waste).

This does not replace symptomatic testing. If you have symptoms, you should self- isolate immediately, book a PCR test and follow national guidelines.

What should you do after the test?

If anyone tests **positive you, your household, any support bubbles you are part of** should self-isolate immediately in line with NHS Test and Trace guidance for 10 days.

You need to report your result to both NHS Test & Trace and to Oaklands **using Test Register**.

You should [order a confirmatory PCR test](#) if you are testing at home (confirmatory PCR tests are not needed if the test was conducted at the Asymptomatic Test Site at School).

If the result of the test is **unclear (void)** you should do another test.

Negative and void results should be reported to both NHS Test & Trace and Oaklands **using Test Register**.

A negative result does not guarantee that you are not carrying the virus. So, you should continue to follow social distancing, and other measures to reduce transmission such as wearing a face mask and regularly washing your hands and observing social distancing.

If you or anyone in your household gets symptoms of the virus you should follow [national guidelines on self-isolation and testing](#).

You need to Report each Test Result

The result of each test needs to be reported.

Test Register enables you to report to the school and the NHS Test & Trace platform as you are directed to record the result for school and then re-directed to the NHS reporting platform.

Why Take Part?

Taking part in testing is voluntary and all students will be able to attend Oaklands whether they take part in testing or not.

I am strongly encouraging all students to take part. Testing at home will allow your child and other students to attend Oaklands as safely as possible.

Please contact Mr D Cooley, our COVID-19 Coordinator, if you have any questions or concerns about home testing on D.Cooley@oaklandscatholicschool.org

Thank you for your support.

Yours sincerely

A handwritten signature in black ink, appearing to read 'Matthew Quinn', with a horizontal line underneath the name.

Mr M Quinn
Headteacher

Some Frequently Asked Questions

Do I need to give consent?

Students and parents do not give written consent to take part in the home testing programme. Please read the information below on how personal information and test results are shared and the privacy notice on our website or by clicking [here](#).

Once you open the kit you should take and report the results of the tests to NHS Test & Trace and Oaklands regardless of the result (positive, negative, or void) **using Test Register**.

Can my child take the test themselves?

Students aged 18 and over should do the test themselves and report the result, with help if they need it.

Students aged 12-17 should do the test themselves with adult supervision. The adult may help the student to take the test if they need support.

Students aged 11 must be tested by an adult and the adult must report the result.

Reporting problems or issues with testing

If there is an issue with the test kit, for example something is missing, please report it using the 'log an incident' section of the Test Register.

If an accident or injury happens whilst using the test kit, please seek medical care by calling 111 (or 999 if it is an emergency). Please also report what happened using this website: <https://coronavirus-yellowcard.mhra.gov.uk/>

What type of tests will be used?

We will be sending home Lateral Flow Device (LFD) tests. They are a fast and simple way to test people who do not have symptoms of COVID-19, but who may still be spreading the virus.

The tests are easy to use and give results in 30 minutes.

Further information: <https://www.gov.uk/guidance/understanding-lateral-flow-antigen-testing-for-people-without-symptoms>

Are LFD tests accurate?

Lateral Flow Devices identify people who are likely to be infectious. These individuals tend to spread the virus to many people and so identifying them through this test is important.

These tests have been widely and successfully used to detect COVID-19 in asymptomatic individuals and are approved by the Medicines and Healthcare products Regulatory Agency (MHRA). The speed and convenience of the tests supports the detection of the virus in asymptomatic individuals, who would not otherwise have got tested.

The tests are highly specific, with low chance of false positives. They are also very sensitive and are able to identify the majority of the most infectious yet asymptomatic individuals. Extensive evaluation has been carried out on the tests and it shows that they are both accurate and sensitive enough to be used in the community for screening and surveillance purposes.

It is important to remember that these tests are only an aid to help stop the spread of the virus and you should continue to follow other guidance such as on wearing face coverings and social distancing.

How are LFD tests different to PCR tests?

There are two main types of test to check if you have coronavirus:

- polymerase chain reaction (PCR) tests check for the genetic material (RNA) of the virus in the sample - you send the sample for processing at a lab
- lateral flow device (LFD) tests detect proteins called 'antigens' produced by the virus

LFD tests give rapid results, in 30 minutes after taking the test.

What does it mean if my child has a positive result?

If your child has a positive antigen LFD test result they, their household and any support bubbles they are part of should self-isolate immediately in line with NHS Test and Trace guidance for 10 days. You need to report your result to both NHS Test & Trace and Oaklands **using Test Register**.

You should order a confirmatory PCR test if you are testing at home (confirmatory PCR tests are not needed if the test was conducted at the Asymptomatic Test Site at Oaklands).

You can [book a test here](#).

What does it mean if my child has a negative result?

A negative result does not guarantee that your child is not carrying the virus. So, you should continue to follow social distancing, and other measures to reduce transmission such as wearing a face mask and regularly washing your hands.

What if my child has a void result?

If the result of the test is unclear (void), they should take another one. If the next test is also void, your child should take a PCR test. You can [book a test here](#).

All test results need to be reported to both NHS Test & Trace and Oaklands using **Test Register**.

Do I need to send the test to a lab?

No. The LFDs supplied do not need to be sent to a laboratory to get a result and can give a quick result in around 30 minutes. Guidance on self-testing is contained in the 'Instructions for Use' leaflet, which comes with the test kit. There is also a useful video to show you how to take the test [here](#).

How do you report the result?

All test results, positive, negative or void need to be reported to both NHS Test & Trace and Oaklands using **Test Register**.

You will receive a text or email from NHS Test & Trace confirming that you have reported your test result.

Can I or someone else in my household use a test kit sent home from school?

No, however whole families and households with primary school, secondary school, and college age children, including childcare and support bubbles, will be able to test themselves twice every week from home. This testing can be accessed through the following channels:

- get a rapid test at work, through workplace testing. Ask your employer for more information
- attend a test site to get tested where you will be able to see how to take the test or pick up tests to do at home (you can find your nearest test site via the postcode checker www.gov.uk/find-covid-19-lateral-flow-test-site or check your local council website)
- collect tests to do at home, find your nearest collection site [COVID Test Finder \(test-and-trace.nhs.uk\)](https://www.nhs.uk/covid-19/test-finder)

If these options are not possible, there will be a supply of rapid tests for order online for people who need them the most. More information can be found on www.gov.uk/order-coronavirus-rapid-lateral-flow-tests

There is [more information available about testing for households and bubbles of students](#).

How will personal information and test results be shared?

When your child takes a Lateral Flow test, you need to report the result. This is so that their test result can be traced, which means that you need to share some information about your child.

You need to tell the Department for Health and Social Care (DHSC):

- your child's name
- your child's test result
- the reference number on the Test Kit

You will also need to tell your child's school or college their test result.

Under UK law, your child's school or college can collect and store test result data because it is in the 'public interest'. This means that your child's data helps us to stop the spread of the virus, and to keep your children in school. For example, we will tell your child to self-isolate if they get a positive test result.

Schools and colleges will only share information with the Department of Health and Social Care (DHSC) if the test kits used are found to be faulty. If this happens, DHSC will use our information to contact people who used the faulty tests, so that they can be tested again. This will ensure that testing is accurate and helps keep us all safe.

When you report test results online, you are sharing information with DHSC. They may share the information with your GP, local government, NHS, and Public Health England. This is so that they can offer your family health services and guidance if your child needs to self-isolate. They might also use your child's data anonymously (without their name or contact information) to research COVID-19, and improve our understanding of the virus.

For more information on how personal data is used for testing please see the detailed privacy notice [here](#).
